

## CONFERENCE AGENDA 2010

- 10:30 **Chairman's Opening Address**  
**Gareth Bourhill, APEA Chairman**  
Gareth will commence the day's proceedings by welcoming all attendees and staff to the most celebrated event in the APEA calendar.
- 10:40 **Containment Systems in Very High Risk Areas**  
**Jamie Thompson, Chairman of APEA Technical Committee**  
Jamie will be questioning the EA policy on storage systems in high risk areas and putting alternative views on managing the numerous risks associated with such storage. The talk will cover both underground and above ground tanks and pipework systems. Jamie has over 40 years experience in this field as a regulator, he is also convener of the CEN tank and equipment committees and chairs the APEA Technical committee.
- 11:00 **Introducing the New Guidance on Forecourt Control Measures**  
**Ray Blake, Head of Petroleum at PAPS & Brian Humm, Head of Petroleum Enforcement, London Fire & Emergency Planning Authority**
- 11:20 **Refreshment Break**
- 11:40 **Vapour Recovery Efficiency Standard**  
**Stefan Kunter, MD of ELAFLEX HIBY Tanktechnik GmbH & Co**  
A full overview of the new EU Directive 2009/126/EC and the work of the European Committee for Standardization CEN, regarding Stage II Vapour Recovery.
- 12:00 **Managing the Risk – for Regulators, Contractors & Forecourt Operators**  
**Malcolm Railson, MD of Urgent Technology**  
In a climate where safety within the petroleum industry is being placed under the spotlight, it is increasingly important for all parties involved to play their part in managing the potential risk. Malcolm's presentation will cover areas including; the use of preventative maintenance schedules; ensuring statutory inspections are kept up to date using document management tools; real time tracking and visibility of maintenance tickets; knowing when contractors are on site and carrying out unannounced safety audits; warning contractors of potential safety hazards; identifying problem equipment; correctly reporting incidents.
- 12:20 **Conference Close**
- 12:30 **Lunch**
- 13:15 **APEA AGM**
- TRAINING AND DEMONSTRATION WORKSHOPS**
- 14:00 **Workshop One**  
**Speaker: Mark Whitley, Customer Support Engineer for Franklin Fueling Systems (PetroTechnik Ltd.)**  
**Polyethylene pipework fabrication and Electrofusion demonstration**  
Mark will provide a hands-on demonstration of pipework joint preparation and Electrofusion welding. He will also demonstrate and compare different secondary containment fittings.  
**Mark will be accompanied by Brian Doggett, UK Sales Manager for Franklin Fueling Systems (PetroTechnik Ltd.)**

14:30

### **Workshop Two**

**Speaker: Jerone Van Pelt of Tokheim**

#### **Automatic temperature compensation ( ATC) at the dispenser**

Jerone will explain how ATC works and demonstrate the equipment which is fitted to a dispenser to enable it to perform ATC. He will also explore the operational factors which determine the commercial benefit of ATC on the petrol forecourt owner

**Jerone will be accompanied by Adrian Beeby, *National Sales Manager for Tokheim (UK)***

15:00

### **Workshop Three**

**Speaker: Gareth Jenkins of Fairbanks Environmental Ltd**

#### **Real time wetstock analysis explained**

Gareth will explain what 'real time data' is, how it is collected from a service station and how it is used to provide a range of diagnostic tools to help pinpoint the source of wetstock loss, making this technique a powerful addition to a service station owners options for adequate leak detection provision

15:30

### **Workshop Four**

**Speaker: Mike Marston of OHES**

#### **The Environmental Damage Regulations**

In this final workshop of the day, Mike will be covering the following points in relation to Environmental Damage Regulations:

- When the regulations would apply
- Who are the regulators / enforcers of the regulations
- Levels of remediation / requirements
- Habitats and Species
- Insurance implications / policy cover
- Case study / Example

16:00

### **Workshops Close**
